

# CIFAR-10 竞赛

庄壮伟

2017.07.28

# 数据集介绍

- 官网：<https://www.cs.toronto.edu/~kriz/cifar.html>
- **60k**张图片，**10**个类别，每个类别**6k**张图片
- 训练集包括**50k**张图片，测试集包括**10k**张图片

# 要求

---

## 评价标准：

- 方法不限，平台不限（建议用PyTorch或者Caffe）
- 根据测试集的**准确率**进行排名，精确到**0.001**
- 准确率相同，则根据**时间**进行排名，精确到**0.01s**
- 排名第一得**100**分，最后一名为**10**分，其他为**0**分

- 使用Caffe需要在/home/test01/caffe-1.0/路径下运行命令
- 使用Caffe的python接口，需要将/home/test01/caffe-1.0/python/添加到PYTHONPATH

# 要求

---

## 附加说明：

- 请单独写好测试文件
- 最多使用**1**个GPU
- 测试时间**>10s**的模型不予考虑（减去初始化时间），测试时间的代码请在程序中写好
- 测试出错或者运行方式过于复杂的程序不予考虑
- 输出结果不合规范的程序不予考虑

# 要求

---

## 结果提交：

- 程序 ( Caffe: .prototxt, PyTorch: .py )
- 模型文件(Caffe: .caffemodel, PyTorch: .pkl)
- 说明文档
- 其他 ( 自己认为可以对实验进行说明的文件 )
- 打包发送到刘璟邮箱

## 邮件要求：

- Email: liujing\_95@outlook.com
- Subject : 第X次作业\_姓名\_大学\_导师

# 要求

---

## 时间计算

---

//模型搭建

//载入模型参数

//...

t = start\_time

for (x, y) in enumerate(test\_loader):

    //testing

t = end\_time-t

//保存结果

---

## 要求

---

- 结果保存在txt文件中：`result_name_school_supervisor.txt`
- 内容：`method testing_time accuracy`

示例：

`result_zhuangzhuangwei_scut_zhujinhui.txt`

---

ResNet 1.8524 0.935

---

# 方法比较

Result	Method	Venue
96.53%	Fractional Max-Pooling 	arXiv 2015
95.59%	Striving for Simplicity: The All Convolutional Net 	ICLR 2015
94.16%	All you need is a good init 	ICLR 2016
94%	Lessons learned from manually classifying CIFAR-10 	unpublished 2011
93.95%	Generalizing Pooling Functions in Convolutional Neural Networks: Mixed, Gated, and Tree 	AISTATS 2016
93.72%	Spatially-sparse convolutional neural networks 	arXiv 2014
93.63%	Scalable Bayesian Optimization Using Deep Neural Networks 	ICML 2015
93.57%	Deep Residual Learning for Image Recognition 	arXiv 2015
93.45%	Fast and Accurate Deep Network Learning by Exponential Linear Units 	arXiv 2015
93.34%	Universum Prescription: Regularization using Unlabeled Data 	arXiv 2015

# 参考模型

- PyTorch:

Docs » torchvision.models

[View page source](#)

## torchvision.models

The models subpackage contains definitions for the following model architectures:

- [AlexNet](#)
- [VGG](#)
- [ResNet](#)
- [SqueezeNet](#)
- [DenseNet](#)

NOTES

- ⊞ Autograd mechanics
- ⊞ Broadcasting semantics
- ⊞ CUDA semantics
- ⊞ Extending PyTorch
- ⊞ Multiprocessing best practices

## ● Caffe:

<https://github.com/BVLC/caffe/wiki/Model-Zoo>

The screenshot shows the GitHub Wiki page for the BVLC/caffe repository, specifically the 'Model Zoo' page. The page header includes the repository name 'BVLC / caffe' and statistics: 1,994 Watchers, 19,295 Stars, and 11,845 Forks. The navigation bar shows 'Code', 'Issues (508)', 'Pull requests (250)', 'Projects (0)', 'Wiki' (selected), and 'Insights'. The main content area is titled 'Model Zoo' and notes that 'Valentin edited this page a day ago · 113 revisions'. It provides instructions on how to acquire a model, including downloading model gists and weights. A 'Table of Contents' is listed on the left, and a 'Pages (35)' sidebar is on the right.

**Model Zoo**  
Valentin edited this page a day ago · 113 revisions

Check out the [model zoo documentation](#) for details.

To acquire a model:

- download the model gist by `./scripts/download_model_from_gist.sh <gist_id> <dirname>` to load the model metadata, architecture, solver configuration, and so on. ( `<dirname>` is optional and defaults to `caffe/models`).
- download the model weights by `./scripts/download_model_binary.py <model_dir>` where `<model_dir>` is the gist directory from the first step.

or visit the [model zoo documentation](#) for complete instructions.

**Table of Contents**

- Berkeley-trained models
- Network in Network model
- Models from the BMVC-2014 paper "Return of the Devil in the Details: Delving Deep into Convolutional Nets"
- Models used by the VGG team in ILSVRC-2014
- Places-CNN model from MIT.
- GoogLeNet GPU implementation from Princeton.
- Fully Convolutional Networks for Semantic Segmentation (FCNs)
- CaffeNet fine-tuned for Oxford flowers dataset
- CNN Models for Salient Object Subitizing.
- Deep Learning of Binary Hash Codes for Fast Image Retrieval

**Pages (35)**
